## PACarb

Cameron type PACarb is a high quality powdered activated carbon manufactured from carefully selected grades of a resinous wood charcoal and high quality coal. It is activated in a rigidly controlled oxygen-rich atmosphere to ensure consistency in quality. It exhibits a well developed broad pore size spectrum and excellent adsorption characteristics. It is particularly recommended for use in municipal water treatment plants in the production of drinking water. PACarb complies fully with AWWA B600-90 specification and is certified in compliance with ANSI/NSF Standard 61. Standard packaging is in 50 lb bags, 1,000 lb bulk bags or bulk road/rail containers.

Wet Screen Analysis	90% <325 minimum
Iodine Number	550 mg/g average
Moisture Content (as packed)	7% w/w maximum
Bulk Density	25 - 28 lb/ft <sup>3</sup>
Apparent Density	0.45 g/mL
Tannin Value	1,000 mg/L maximum
pH	9 maximum
Phenol Number	2.0 — 2.5 g/L
Ash Content	8 % w/w maximum
