## SG6

Cameron type SG6 is a high activity granular activated carbon manufactured from a carefully selected grade of high quality coconut shell. In addition to a very high degree of activation this product also offers excellent mechanical strength and a highly developed micropore structure. It is suitable for a variety of liquid phase applications including dechlorination, adsorption of lower molecular weight organic contaminants, taste & odor control and solvent purification. Standard packaging is in 200 lb drums, 50 lb bags or 1,000 lb bulk bags.

|   |                                 |
|---|---------------------------------|
| Mesh Size                                   | 8x30, 12x40                     |
| Carbon Tetrachloride Activity               | 60% w/w minimum                 |
| Moisture Content (as packed)                | 5% w/w maximum                  |
| Hardness Number                             | 97 minimum                      |
| Apparent Density                            | 0.49 g/mL minimum               |
| Surface Area (N <sub>2</sub> B.E.T. Method) | 1,050 m <sup>2</sup> /g minimum |
| Ash Content                                 | 2% w/w maximum                  |
