SG6

Cameron type SG6 is a high activity granular activated carbon manufactured from a carefully selected grade of high quality coconut shell charcoal. In addition to a very high degree of activation this product also offers excellent mechanical strength and a highly developed micropore structure. It is, therefore, an ideal choice for most vapor phase applications, process gas purification, solvent recovery, respirators and catalyst supports. Standard packaging is in 200 lb drums, 50 lb bags or 1,000 lb bulk bags.

Mesh Size	4x8, 4x10, 6x12, 8x16
Carbon Tetrachloride Activity	60% w/w minimum
Moisture Content (as packed)	5% w/w maximum
Hardness Number	97 minimum
Apparent Density	0.49 g/mL minimum
Surface Area (N ₂ B.E.T. Method)	1,100 m ² /g minimum
Ash Content	2% w/w maximum
